Server-less solution with built-in rugged SSD

SolidEDGE is server-less cloud managed solution designed for professional surveillance applications. It comes equipped with a built-in rugged SSD that allows for local storage of video footage, eliminating the need for external storage devices.

Cloud video management with WAVE sync

The SolidEDGE system could be merged with other SolidEDGE systems through WAVE sync, giving additional flexibility to the system. This feature enables remote access and management of on-premise security systems from anywhere in the world. Wave sync also keeps the system up-to-date with regular software and security updates.

Global

Wave Sync

Local1 Local2 Local3

Flexible system structure

The SolidEDGE camera can integrate up to 6 cameras with a single EDGE camera, with embedded WAVE license. A total of six cameras, including EDGE camera, can store and monitor up to 6 video channels, making it suitable for various sites. The EDGE camera includes a Wisenet WAVE license, which syncs with additional cameras that are integrated with EDGE camera.

1CH 2CH 3CH 4CH 5CH

SSD status management

The built-in rugged SSD of the SolidEDGE camera offers high-speed and reliable storage for video data. The SSD status management feature, which could be accessed from the camera web viewer, provides information on the health of the SSD drive, ensuring the system is running smoothly.

Specification

PNV-A6081R-E1T, PNV-A6081R-E2T

- Based on 2MP P AI series camera
- 1TB / 2TB SSD storage options available
- 1x Professional WAVE license pre-loaded
- Encrypted software updates are provided to the camera to ensure best cyber security.
- 2MP, 4.4~9.3mm motorized V/F lens
- Support H.265/H.264/MJPEG
- WiseIR 40m
- Next level cybersecurity
- Device Certificate(Hanwha Techwin Root CA, pre-installed)
- TPM 2.0 (FIPS 140-2 level2 certified), Secure OS/boot/storage, Verified FW forgery
- Support PoE+/12VDC
- Hard-coated dome bubble
- IP66/IP67/IP6K9K, NEMA 4X, IK10
