

Hanwha Vision Awarded FIST 2023 for Product of the Year in Video Surveillance System

- **FIST Award is presented by the topmost Industry apex body FSAI (Fire and Security Association of India)**
- **Every year FIST Awards is given to the Best of the Industry product companies**

Hanwha Vision, a global vision solution provider, awarded top Indian industry award for bi-spectrum thermal AI cameras. The safety and security sector is once again quite literally all geared up about Bi-Spectrum Thermal AI, the newly launched T-series top of the line product having Dual sensor camera featuring a VGA thermal and 4K visible video output with pre-installed analytics events based on AI engine (NPU) present in both thermal and visible channel that helps to detect traffic jam, stopped vehicle, object to name few of the many breakthrough features this product is power packed with.

At the Finest Skills & Talents (FIST) Awards 2023 held at Sofitel, Mumbai-BKC on 24th August 2023, this innovative technology from Hanwha Vision was recently named Product of the Year in the Video Surveillance category and presented with the renowned FIST Award – India’s number one fire safety and security accolade. The panel of jury includes member of the Advisory Council of the Fire and Security Association of India (FSAI) and other key members from the Government of India, Key enterprises and consulting firms. This award is presented annually, together with the PwC auditing and consulting firm.

At Hanwha Vision our focus is not only to lead in Video Surveillance domain but also in the next generation Vision Solution. The product of the Year award for our Bi-Spectrum thermal camera is an important Milestone and recognition for us globally. The approval and support from Elite Jury member across various domains in the areas of Law & Enforcement, Technology Consultant, End User & Partners is a testimony of our vision to create a niche product which outperforms in the Critical Environmental conditions.”, says Ajay Dubey, Country Manager at Hanwha Vision India

“Hanwha Vision’s Bi-Spectrum Thermal AI and other AI products such as Q AI, X AI or P AI comes out bundled with numerous useful AI functions available directly at the edge device. Awards for our technology reflect the recognition and appreciation of the markets and are therefore a reliable indicator for decision-makers to choose us as their most preferred choice,” says Soumik Ghosh, Head of Product & Marketing at Hanwha Vision, India.

“Best Product of the Year –Video Surveillance category for 2023 reassures our confidence on the progressive Indian market sentiments for Hanwha Vision.

Dedication, perseverance and continuous innovation to be the No.1 Brand in India has been the core vision of our Senior Leadership team led by our Head Of PM and Marketing & I am

confident that many more such accolades will be on our way in future. Thank you FSAI and respected Jury members to have the trust upon us” says Michael Minsang Jo, Director –INDIA & SAARC
